Science Advances: network PGG — direction observed
2 seeds × 4 colonies; 60 updates; some remain mixed
Final fraction cooperating
Star, r=3
Star, r=6
Complete, r=6
NC: repeated PD — recovery criterion not met
Exploratory recovery criterion
Late mutual-cooperation fraction
Observed initial incident
CC
CD
DD
NC: collective foraging — cue interaction not observed
2 seeds; one map per type; 120 physical steps
Cue-on minus cue-off group rewards
Clustered
Random
